

Bandit Level 14 → Level 15

The password for the next level is obtained by sending the current Bandit 14 password to a service running on localhost port 30000.

Step 1: Check your current password

After logging in as bandit14, run:

```
cat /etc/bandit_pass/bandit14
```

You should get the Bandit 14 password.

Step 2: Send the password to port 30000

Use:

```
nc localhost 30000
```

Then paste the password you got from Step 1 and press Enter.

You should receive a message similar to:

Correct!

<password for bandit15>

The output is the password for bandit15.

Step 3: Exit

exit

In short:

```
cat /etc/bandit_pass/bandit14  
nc localhost 30000
```

Paste the password → press Enter → copy the password for bandit15.

Enjoy your stay!
