

Bandit Level 8 → Level 9

The password is stored in `data.txt`. Your task is to identify the line that appears **only once**.

Step 1: Locate the file

Run:

`ls`

You should find:

`Data.txt`

```
bandit8@bandit:~$ ls
data.txt
bandit8@bandit:~$ |
```

Step 2: Get the line that appears once

Run:

`sort data.txt | uniq -u`

What this does:

- `sort` puts identical lines together.
- `uniq -u` shows the line that has no duplicate.

The displayed line is the **password for bandit9**.

Then exit from the level.

```
bandit8@bandit:~$ sort data.txt | uniq -u
EjmOSvuAu7sGAHqHVcBDPirRe9T03kx1
bandit8@bandit:~$ |
```
