

Bandit Level 9 → Level 10

The password is stored in `data.txt`.

The clue tells us that the password is one of the **readable strings** and is preceded by several `=` characters.

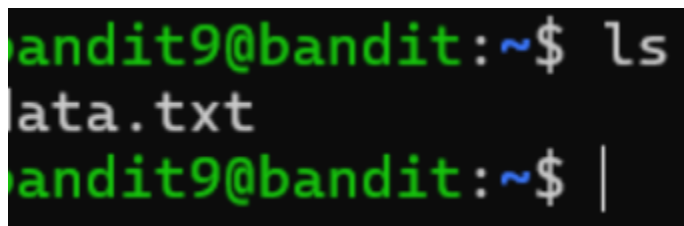

Step 1: Check the file

Run:

`ls`

You should see:

Data.txt

A terminal window with a black background and green text. The prompt is 'bandit9@bandit:~\$'. The user has entered 'ls' and the output is 'data.txt'. The prompt is now 'bandit9@bandit:~\$ |'.

Step 2: Extract readable text

Run:

`strings data.txt`

This converts the binary-looking content into readable text so you can identify the string containing several `=` characters.

Step 3: Find the password

Look through the output for the line containing the required `=` characters. That line contains the password for **Level 10**.

Then exit from the leve

```
