

Bandit Level 5 → Level 6

Objective

Find the file containing the password for **Level 6**. The required file must be:

- Human-readable
- Exactly **1033 bytes**
- Not executable

Execution

1. Log in as **bandit5**

List the contents of the home directory:

```
ls -al
```

You will find a directory named:

inhere

2. Enter the directory

```
cd inhere
```

Purpose:

`cd` allows us to move into the **inhere** directory where the required file is located.

```
bandit5@bandit:~$ ls -al
total 24
drwxr-xr-x  3 root root    4096 Jun 24 14:59 .
drwxr-xr-x 150 root root    4096 Jun 24 15:02 ..
-rw-r--r--  1 root root     220 Feb 13  2026 .bash_logout
-rw-r--r--  1 root root   3851 Jun 24 14:50 .bashrc
-rw-r--r--  1 root root     807 Feb 13  2026 .profile
drwxr-x--- 22 root bandit5 4096 Jun 24 14:59 inhere
bandit5@bandit:~$ cd inhere
bandit5@bandit:~/inhere$ find . -type f -size 1033c ! -executable
./maybehere07/.file2
bandit5@bandit:~/inhere$ |
```

3. Search for the correct file

Use the following command:

```
find . -type f -size 1033c ! -executable
```

Purpose:

This searches for a regular file that is exactly **1033 bytes** in size and does not have executable permission.

The result is:

```
./maybehere07/.file2
```

4. Display the file contents

Run:

```
cat ./maybehere07/.file2
```

Purpose:

`cat` displays the contents of the identified file.

The command reveals the password for the next level:

```
pXa26xhMWaC2SvDotA4r9EgZkul0eSBW
```

Password for Level 6

```
pXa26xhMWaC2SvDotA4r9EgZkul0eSBW
```

Then exit from that level.

```
bandit5@bandit:~/inhere$ cat ./maybehere07/.file2
pXa26xhMWaC2SvDotA4r9EgZkul0eSBW
```

```
bandit5@bandit:~/inhere$ |
```
